English

Hindi

PROFILE

Enthusiastic and detail-oriented Full Stack Web Developer with a strong foundation in MERN stack (MongoDB, Express.js, React, Node.js). Skilled in building dynamic, responsive web applications and eager to apply knowledge in both front-end and back-end development. Passionate about delivering innovative solutions, enhancing user experiences, and contributing to collaborative projects in fast-paced environments.

PROJECTS

Frontend Projects :

Fruit-Market:

- Built a responsive fruit market platform using ReactJS and Tailwind CSS for seamless cross-device compatibility.
- Added Framer Motion animations to enhance user interactions and visual appeal.

Cosmic Daily Website :

- Developed a website using React and custom CSS to display daily space images with detailed explanations from the NASA APOD API.
- Integrated API handling to fetch and render updated content dynamically.

Workout Planner :

- Developed a customized workout planner using React and Tailwind CSS, offering personalized workout plans based on user goals.
- Implemented a core workout functionality in the JavaScript file, acting as a small database within the React project.

Full Stack Projects :

Forever E-Commerce App :

- Developed a full-stack e-commerce app using ReactJS, Tailwind CSS, and React Router for a seamless and dynamic user experience.
- Implemented backend with Node.js, Express, and MongoDB to handle user data, product listings, and orders.
- Integrated Stripe for secure payment processing and React Toastify for real-time notifications.

Text-to-Image Generator :

- Built a text-to-Image generator using ReactJS and Node.js, integrating DALL-E API for dynamic image generation.
- Implemented API handling to convert text input into speech and display related images in real time.
- Designed a user-friendly interface with React and Tailwind CSS for seamless interaction
